> The President Makes Twelve Within South Dakota's Confines.

> > Tariff and General Prosperity of the Country the Themes Chiefly Discussed-His Most Notable Address of the Number Delivered at Sioux Falls on the Wage Worker and Tiller of the Soil.

> > > [BY THE ASSOCIAT ED PRESS-P.M.]

BERDEEN (S. D.) April 6.—The President today traversed South Dakota and made more speeches than on any other day during his present trip. He began with two speeches at Sloux Falls this morning, and ended his twelfth speech this evening at Aberdeen. The speeches were confined for the most part to the tariff and to the general prosperity of the country. In all his speeches today, he followed closely the lines of his former addresses on these subjects. The President was accorded a cordial welcome at the different stopping places, and at many stations where the train did not stop crowds gathered and cheered, as the special train sped by. One feature of the day was the large number of children in the various audiences, and the President referred to them several times, saying that he was glad to see that the stock was not dying out.

At Tulare the President departed from his usual custom and shook hands with the people gathered at the station. Yankton was the first stop after the train left Sioux Falls. To the multitude at Yankton, the President spoke on the tariff and the qualities of good citizenship, saying in this connection: "It has been a pleasure to see you, and I can sum up all I have to say toyou in a couple of phrases. You need

the mistake of thinking that any law or any administration of the law can take the place of the fundamental qualities that make a good individual citienship and make a good nation, the qualities of honesty and courage and good common sense."

At Mitchell the President made the longest address of the day. His audience was large and his speech was frequently interrupted by applause. Here he discussed the work of individuals and the important part they play in the upbuilding of the nation.

"You can uplift a man, if he stumbles, If he lies down, you cannot carry "You can uplift a man, if he stumbles. If he lies down, you cannot carry him. If you try to it will not help him and it will not help you. So, fundamentally, it must rest upon yourself to win success. As I have said, law can do something; wise legislation, wise administration of the government can do something. If you have laws sadly administered they will spoil any prosperity. It is easy emough to get a bad law that will stop the whole business, but to get a good law it is not

More and more in our great industrial centers men have come to realize that they cannot live as independently of one another as, in the old days was the case everywhere, and as is now the case in the country districts.

old days with case in the country districts.

Of course, fundamentally each man will yet find that the chief factor in determining his success or failure in life is the sum of his own individual qualities. He cannot afford to lose his individual initiative, his individual will and power; but he can best use that power if for certain objects he unites with his fellows. Much can be done by organization, combination, union among the wage workers; finally something can be done by the direct action of the State. It is not possible empirically to declare when the interference of the State should be deemed legitimate and when illegitimate.

The line of demarcation between unealthy lack of regulation is not always well defined, and shifts with the change in our industrial needs. Most certainly we should never invoke the interference of the State or nation unless it is absolutely necessary; but it is equally true that when confident of its necessity we should not on academic grounds refuse it. Wise factory laws, laws to

true that when confident of its necessity we should not on academic grounds refuse it. Wise factory laws, laws to forbid the employment of child labor and to safeguard the employés against the effects of culpable negligence by the employer, are necessary, not merely in the interest of the wage worker, but in the interest of the honest and human employer, who should not be penalized for his honesty and humanity by being exposed to unchecked competition with an unscrupulous rival. It is far more difficult to deal with the greed that works through cunning than with the greed that works through violence. But the effort to deal with it must be steadily made.

"Unless otherwise provided by the organic law of the corporation, the right of a stockholder to vote upon his stock at all meetings of shareholders is a right inherent in the ownership of the shares, and as such a property right. If the right of the 200,000 shares beneficially owned by the Union Pacific Railroad Company to vote be denied, it must be either upon the ground that the shares have been illegally issued, or that the company is incapable in law of holding such shares, or that some public policy will be offended if it shall be suffered to exercise the ordinary incident of such ownership by voting them in stockholders' meetings, or that the property rights of the minvoting them in stockholders' meetings, or that the property rights of the minority are to be thereby so seriously put in jeopardy as to justify a court of equity in practically turning the owners and holders of such shares out of control and management of the defendant corporation and placing in control the minority in shareholding interest.

"To justify such a result. I should have to hold and adjudge either that the Union Pacific Raliroad Company was incapable of legally acquiring and holding shares in the Union Pacific Company, or that, if competent to own and hold such shares, it ought not to be suffered to exercise the right of participating in the election of directors, if such participation may result in placing the Union Pacific company in a position where it will be capable of controling and dominating the management of the defendant company.

presented to the United States government the twenty-two monuments erected at a cost of \$25,000 in honor of the twenty-two Indiana regiments that participated in the battle of Shiloh. Gen. Lew Waliace presided, and in his address he said the Army of the Tennessee had no commander at Shiloh, and was needlessly surprised by Gen. Albert Sidney Johnston. The monuments were presented to the State by Col. James Wright of the Indiana commission which has had charge of their erection. Gov. W. T. Durbin then presented the monuments to the government and they were accepted by William Carey Sanger, Assistant Secretary of War, who spoke as follows: "In the absence of the Secretary of War, it is my privilege to receive, on

War, it is my privilege to receive, of behalf of the United States, these most uments which have been erected, to perpetuate the heroism of the soldiers of Indiana. The Pederal government, in accepting these monuments, becomes charged with the duty of guarding them and keeping fresh in the memory of the people a record of the deeds which they commendate. In creating and people a record of the deeds which they commemorate. In creating and keeping these national parks the government is not merely perpetuating the fame of brave men; it is not merely recording with landmarks of granite and bronze the part which the gallant soldiers on both sides took in the awful contests of the Civil War; it is not only emphasizing the fact that a united country thinks with pride of the valor of all the heroes who fought in that great struggle, but it is putting into visible form the conviction of the people that the examples of brave and faithful performance of duty should ever be honored throughout our land. "We should never forget that the lessons of war are but imperfectly

ever be honored throughout our land.

"We should never forget that the jessons of war are but imperfectly learned, if we think of them as only helping us to bear ourselves bravely in the face of an armed enemy. In times of peace there are battles to be fought and victories to be won, the effect of which upon the destinies of mankind are as far reaching as the results of an armed conflict. Honor, courage, in, tegrity, devotion to principle, and the falibful performance of duty are just as ensemths to the greatness of a free people as courage and self-sacrifice are to the success of a fighting army.

"The principles upon which our government rests do not of themselves insure good government; they merely give to the people the power to have that kind of government which the people desire, and they can make it as good or as bad as they wish. As patriotic Americans we should not be discouraged because there is need in so many directions for faithful and effective work in improving existing conditions. From these impressive scenes we can draw inspiration and help for the better performance of the duties which crowd in upon us as American citizens. The memory of the brave soldiers who fought on this and other battlefields will never die, for so long as the country endures, their example will help the men and women in the years yet to come to strive courageously toward that high standard to which every American should aspire."

Senator Albert J, Beveridge of Indiana, followed. He said, in part:

"Since all must die, how fortunate to die for an undying cause, and under the approving eye of history.

"So fell those who fell upon this field. For they gave their lives to save the life of the nation, and history recities no nobler story than the story of their sacrifice.

"Their blood was shed to make the American people a single untion, and

on his own little daughter at the Children's Hospital. The child suffered from a severe case of congenital dislocation, and the results would seem to fully have tested the efficacy of the invention.

The machine consists of a sort of easy chair, in which the patient sits. The seat is like a bicycle saddle, in which the feet hang clear. The limb to be set is attached by straps to a movable rod, which is worked by a powerful leverage. The effect is exactly like pulling a nail with a draw hammer, the child's leg in this case being the nail.

The great point gained is the doing away with the wrenching and siraining of musces and ligaments which is inseparable from Dr. Lorens's manipulations. This force is applied directly and solely to theseat of trouble. The apparatus may be adopted in a more or less modified form in the Bester.

captains in the army are very apt to have larger families than lieutenants, and will find the tour of duty in Wash-ington an expensive matter. It has been suggested, therefore, that it may be difficult to find officers who are willing to accept general staff duty under such conditions, but members of the board now sitting in this city charged with the duty of selecting for ty-two out of the 491 available do not expect any difficulty in that direction. Some of the members of the board say that while there is something to be said in favor of increasing the pay of officers assigned to general staff duty, there is something also to be said against any such special provision. In the first place, members of the board feel that general staff duty is no more expensive for officers than duty with the staff corps, or duty in connection with the militia, or any other detached service which carries an officer away

the two latter of the Corps of Engineers, will leave New York next Thursday for Colon, for the purpose of appraising the value of the work now in progress on the canal, and which will be prosecuted by the French company up to the moment when the great property comes into the actual possession of the United States.

The agreement to sell the canal was signed by Secretary Hay and Mr. Cromwell. There being no stipulation to the contrary, the company was not bound to continue the heavy daily expenditure on account of the labor and material and superintendence involved in the continuation. It is claimed that a suspension would have worked harm, and have resulted in the loss of a number of canal workers, who have now become experienced and inured to the climate. The canal company undertook to keep the work in progress, and now looks to the United States government for compensation for the expenses in volved in so doing. BANK CIRCULATION.

NO IMMEDIATE INCREASE. (BY DIRECT WIRE TO THE TIMES.) WASHINGTON, April 6.—[Exclusive Dispatch.] Were the two per cent. bonds that the Treasury will issue in place of 2s and 4s to be put into the Treasury as fast as issued, and new circulation issued to banks against them, it is feared by next fall they will be used up, the money lent out for will be used up, the money lent out for commercial or market operations, and thus the main purpose for the refund-ing offer by the Secretary be defeated, and trouble next fall be as acute as if no refunding operations had been carried on at all. Therefore, it is un-derstood to be the firm intention of the Secretary to hold the issuing of new circulation well in hand until the time comes when the country must have more currency, or have a period of pretty sharp money stringency.

more currency, or have a period of pretty sharp money stringency.

By the course intended to be followed the Treasury officials believe they will be able to retain a complete grasp of the situation, by holding the remedy in their own hands, Jointly with the banks, and that the application of the remedy now being provided for next fail's expected financial ills will be comparatively easy. It understood, furthermore, this course has the approval of some important banking interests. Hence while refunding figures may and probably will reach large amounts in the near future no considerable increase in bank circulation can be expected until absolute necessity for such increase approaches

Mrs. Horace Porter. PARIS, April &-{By Atlantic Ca-ble.] Mrs. Horace Porter, wife of the phe.] Mrs. Horace Porter, wife of the American Ambassador here, died here at 5 o'clock this afternoon. Death came with very great suddeness, making the shock to the Ambassador doubly severe. She returned from Switzerland only a few days ago, after a stay of some weeks there for health. Mrs. Porter appeared much improved in health but was still suffering from influenza, which finally brought on a chill. This, in turn, developed into inflammation of the lungs, but it was not until today that her condition was regarded as really serious. She gradually failed, however, until the end came. Gen. Porter, Mrs. Porter's brother, Gen. Winslow, and the attending physicians were at the bedside. The Ambassador is completely prostrated.

KEEPING BANDITS ON RUN.

MANILA, April 6.—The pursuit of the bandits who raided Surigao, Island of Mindanao, recently, continues spir-itedly. The constabulary overtook and defeated the band Saturday on the shore of Lake Mainit, killing five of them. Three of the constabulary were wounded.

The strike, he said, was intended as a protest against the anti-strike laws, as well as to support the demand of the railfroad men for an increase of wages before the passage of the laws made an improvement in their position impossible. The president also said the strike would spread to other branches of labor.

The staffs of the shipping companies trading with London and Hull have stopped work in sympathy with the strikers. All business here is at a standstill on the wharves and the mail boats which arrived here today could not be unloaded.

Few trains arrived or left this city during the evening and all the stations were closed at 10:30, and will remain under military guard during the night. Several street scuffics took place between the police and the mob of roughs, several of whom were injured by saber cuts. All was quiet, however, after 11 o'clock.

Nine hundred out of 1500 in the workshops of the railroad here have struck. The diamond cutters have decided to strike in sympathy with the railroad men.

### ROMAN WORKMEN.

MAY CALL GENERAL STRIKE.
[BY THE ASSOCIATED PRESS P.M.] ROME. April 6.—[By Atlantic Cable.] A meeting of workmen to decided a general strike was called last evening, and is still sitting at an early hour this

morning. The labor trouble started with a strike of typesetters. All the other trades are now asked to join. About 100,000 foreign visitors are here who would leave on the first hint of trouble, and the government has therefore taken energetic measures to maintain order and inspire confidence. The troops in the capital who usually number 12,000 have been more than doubled, and are kept in constant readiness, The government also has taken steps to take possession of the shops of the bakers and butchers.

A formal diner was later given in his hohor, and this was followed by a parade of union laborites. Tonight Mayor Schmitz delivered an address at the carnival grounds.

### Metal Polishers Out.

PHILADELPHIA, April 6.—A strike affecting 350 men and ten shops was inaugurated here today by the Metal Polishers' International Union of North America. They demand an in-Rioting in Baste. BASLE (Switzerland) April 6.—Two thousand five hundred masons and their assistants, who were on strike here, made a demonstration today and endeavored to prevent non-strikers from working. The police interfered, but were stoned by the strikers, many of the policemen being injured. The government has ordered a battation of troops to be mobilised, in order to assist the police. Seven companies of soldiers are now picketing the city.

### Drive | Quit Work.

SAN JOSE, April 6.—Twenty drivers of the wood and coal wagons are on strike otday. They demand shorter hours-eleven, instead of from ten to fourteen, as formerly. The union is not yet involved, and it is probable that the strike will be confined to the men who have walked out.

### VENTURA COUNTY.

TREE TOMATO INTRODUCED. or "poor man's fruit," is the latest of the vegetable productions to find a home in Southern California, and those acquainted with the plant predict a wide popularity for it once it gets wide popularity for it once it gets firmly established, and its great worth becomes known. Mrs. T. B. Shepherd introduced it in this section. She predicts that when it becomes known acres will be planted. It is at once a fruit and a vegetable. It bears from seed the second season, and a young plant set out in the spring grows six feet tall and comes into basing by Christmas. The branches are spreading and the foliage large and handsome. The fruit is pendant in clusters below the foliage, is the size of a large egg, and of a beautiful orange-salmon color when ripe. It has a deliclous sub-acid taste, slightly resembling the tomato. It is deliclous raw, served with sugar and cream, or coboked as sauce, and is also very fine for jelly or jam. It will keep for weeks, as on account of its very tough skin it does not bruise, also because of the solid nature of the fruit covering the seeds, which are like those of the tomate. The fruit is so handsome that it would sell readily on sight; if shipped East during the holiday season it would no doubt be immensely popular. Where it is grown in Ceylon and India it is known as the "poor man's frait." It yields abundantily and is at home in this clime. It is a most ornamental plant and is attractive in conservatory or garden. It is a mative of South

scheme or combination, I would be driven to find as a matter of general law that minority shareholders might restrain a majority shareholder from voting for directors at all upon a showing that the result would probably be the selection of trustees who would not manage the corporation in the interest of its own shareholders, but in an interest which was repugnant to them as a class. The direct effect of any such decree on any of the theories on which I am asked to act, would be to deprive the Union Pacific Railroad Company of one of the most valuable of the incidents of its ownership of its Southern Pacific shares, the right to vote for managing directors at a meeting of stockholders. It is, therefore, according to every definition, an indispensible party to any bill which challenges its right to own or vote upon its Southern Pacific shares. "It must be accepted as altogether fundamental that no court can adjudicate upon the rights or interests of one who is neither actually or constructively before the Sourt. The principle

"This contention is placed upon the two distinct grounds, first, that there is such an identity of interest between the two corporations that the defendant should be regarded as representing and defending for the Union Pacific Company; second, that the Southern Pacific Company is in key the representative of each of its stockholders in respect to all corporate matters.

stockholders in respect to all corporate matters.
"These, in their order: The 'identity of interest' relied upon to obviate the necessity of suing the Union Pacific, consists in the circumstances heretofore stated showing the control exercised by the one company in the management of the other. But it must not be overlooked that the managing agencies which have spoken through the answer of the Southern Pacific deny that they are or have been disthe answer of the Southern Pacific deny that they are or have been disolval to their trust as officers and directors of the Southern Pacific and deny that in their character as officers of the Southern Pacific Company they stand for and represent the other company. They deny that the two roads were in any sense competitive or that there is the slightest repugnance in their acting as directors for both companies.

"To assume that there is such identity of interest as to dispense with the necessity of bringing the Union Pacific Railroad Company before the court would be, first, to decide all the issues of fact and law involved and then say: "These being the facts, and this the law, it is plain that there is such oneness of interest between these companies that the rights of the Union Pacific Railroad Company can be adjudicated without its actual presence, because it is represented by the defendant, which is sued."

"Aside from this inconsistent attitude we cannot ignore the fact that while there may be an identity of interest in some particulars, the question of the right of the Union Pacific Company to hold and vote the shares owned by it is a question which deeply affects its property rights, and in respect of which be Southern Pacific Company as such

"These are two wholly distinct cor-porations, having each its own prop-erties and its own body of stockhold-ers, and neither has any legal right to

"The second ground for maintaining that the Union Pacific Railroad is a party by representation is based upon the very obvious rule that the corporation represents its shareholders in the deferment all with shareholders. other.

"It is a question which may indirectly affect other shareholders, but it is clearly not a question which concerns the corporation as such, or any of its functions. But it has been urged that the idea of a corporation, as a legal entity separate and apart from the body of persons composing its stockholders, as a faction that should be ignored whenever used for the purposes not within the intent of the device, and that in a case like this against the corporation should be regarded as a suit against every corporation and therefore a suit to which the Union Pacific Railroad Company is a party to be represented.

"If the issue made with the Union Pacific Railroad Company in its character as a stockholder of the Southern Pacific was one which was common to all the stockholders, there would be some room for regarding the litigation as involving a corporate matter, interest or function. But the question is

all the stockholders, there would be some room for regarding the litigation as involving a corporate matter, interest or function. But the question is one which does not hpply to the stockholders as a body. Its solution depends absolutely upon a state of facts peculiar to the particular stockholder, and its decision will affect directly the property rights of that owner alone, and does not directly concern any other stockholder as such.

"A judgment or decree against a corporation in respect to corporate matters necessarily binds its members, in the absence of fraud, because, as stated by Fuller. Chief Justice, in Hawkins vs. Glenn 'this is involved in the contract created in becoming a stockholder.' No such reason exists when the judgment or decree against the corporation does not involve some corporate duty, obil, gation, or function, but affects alone the contract rights of a particular stockholder as against the other members of the corporation.

Knowledge of the cannot be a suit is not equivalent to legal notice, and the mere appearance of one as a witness in behalf of one who is an actual party is not an appearance as a party, and has never been so held.

We put it on the ground that no court can adjudicate directly upon a person's right without the party actually or constructively before the court.

"This doctrine has over and again been announced by the Supreme Court, and in no case more emphatically than in Minnesota vs. Northern Securities Company. But the complainants say that the Union Pacific is constructively before the court, being represented by the Southern Pacific Company.

"The case of Minnesota vs. the Northern Securities Company has an important bearing upon this subject. formed that the decision not to make the injunction permanent was based upon a technicality, Judge Lurton holding that the Union Pacific was an indispensable party in the case and would have to be represented in court before an injunction should be granted against it.

He explained that the rulings in the Northern Securities case had determined that actions against stockholder (in this case the Union Pacific could be brought in the legal habitation of the company in which the stockholder has a membership. So the case was not brought against the Union Pacific, but against the Southern Pacific as the representative of all of its stockholdera.

MONMOUTH (III.) April 6.—(Exclusive Dispatch.] Mrs. Marshall Mink who, with her husband, was hynotized by reading Prof. Harraden's books of hypnotism, died at Watertown Asylum The case is one of the most peculiar

and mystifying ever known to medical fraternity. The victims were under 30 years of age, and are the parents of two children. Both were sound mentally and physically. Recently they saw an advertisement

of Prof. Harraden of Jackson, Mich., who proposed to teach hypnotism in twenty lessons. Minks sent for the In the first lesson, both became partially under hypnotic influ-ence, and for several days they con-tinued in that state, both endeavoring to wield their power over the other. HIS MONEY GONE.

Tamale Man Reports Burglary of Nearly Three Hundred Dollars-Young Son Tells Contradictory Stories.

A. T. Swanberg, who lives in a shack in the rear of Foster Bros.' fruit store, next to the Van Nuys Hotel on the north, reported to the police that a burglar had broken into his place and stolen \$275 and a gold watch. Swan-

stolen \$275 and a gold watch. Swan-berg has a tamale stand on Hill street near Fourth. Shortly after the burg-lary was said to have been committed, Swanberg's son, a boy of 15, in the messenger service, ran to his father's lunch wagon and told him that the house had been broken into. Officers found a board loose on the back of the house and a trunk broken open. The watch and \$62 were found in the tray of the trunk, but a bag containing \$210 in silver was missing. Swanberg said that he drew the money from the bank that afternoon to make a payment on a lot.

from the bank that afternoon to make a payment on a lot.

The boy told a contradictory story, and the officers concluded that it was not altogether straight. He said that when he approached the shack, he saw a large man jump from the window and run away. The opening mentioned by him was small, and would not have admitted a boy. He also became mixed in his stories of how he nailed up the board wrenched loose.

Result of Interesting Observations Made at Quarantine Station, Ney York by Passed Assistant Surgeon Grubbs.

NEW YORK, April 6.—(Exclusive Dispatch.) Ever since last June, observations have been made at the quarantine station under the supervision of Passed Assistant Surgeon S. B. Grubbs. Every vessel arriving from ports where the stegomyia, the yellow-tever-bearing morality are provided to the state of the st fever-bearing mosquito, prevails, has been carefully examined to ascertain whether mosquitoes are on board, and if so, their variety, where and when they took passage, and under what conditions. The inspector is armed for this work with a cyanide bottle for them, and a sheet of questions for the captain to answer.

Of the 82 vessels inspected, all ar-

riving from stegomyia-infested only 15 were found to have carried any two of these were rid of their winged passengers as soon as they were well out at sea; three carried them for two days, after which they disap-peared, and one, after seeing, as it is supposed, the last of them, received another visitation when she had go

another visitation when she had got about twenty miles from land at this end of her voyage.

Nine sailing vessels having no mosquitoes abourd before sailing had them appear at sea. A vessel 22 days from Vera Cruz had a case of yellow fever abourd at that place where she lay a mile from the sea wall, three-eighths of a mile from an infected prizon, and 200 yards from another infected ship.

The conclusion reached by Dr. Grubbs as the result of observations at the single quarantine station is that mosquitoes can come aboard vessels underfavorable conditions at fifteen miles from hore; that stegomyia can be carried from Mexican or West Indian ports to those of our Gulf States and that a vessel may become infected ports to those of our Gulf States and that a vessel may become infected with yellow fever though moored a short distance from land, in spite of old beliefs to the contrary.

ROW ABOUT THE FIELD DAY. SANTA BARBARA, April 6.—A row is on over the awards made by the judges at the interscholastic field duy gontests held at Ventura Saturday and in which athietic teams from thirteen High Schools in Southern Cali-fornia participated. The Santa Barfornia participated. The Santa Bar-bara team is causing all the stir, for its members contend that had the de-cisions been made correctly, they would have won the cup and that Pasadena and Santa Paula would have had a tie for second honors. The Pasadena team got first with thirty points to its credit, Santa Paula second with 29 points and Santa Barbara third with 26. The grounds upon which the protest has been filed with the managers of the contest are that in the in restoring Mrs. Mink to her normal state, but only for a brief period. She became worse and worse, and was takent to the asylum.

Supt. Taylor says the case developed into the most violent mania he had ever seen. The patient's sufferings were, terrible. She imagined she had been melted into liquid state, turned into stone and born again. She continued growing worse and sank into a comatose state from which the never rallied.

is published an interesting article of the manner in which electricity is poses, in Massachusetts and in other of the conquering trolley in Massa chusetts has been truly triumphant. Four times as many passengers were carried last year by electric cars, in that State, as by the steam roads "Of course," says Mr. Moffet, "that was due chiefly to the dense city traffic, but still the city street-car systems were prefty complete seven years ago, and the trolley passenger busines has doubled since that time, while the steam passenger business has actually declined."

From the statistics gathered by Mr. Moffet it appears that the electric mileage in the State of Massachusetts has increased by from 9 to 18 the year 1901 the increase amounted to 242.7 miles, while the mileage of steam roads was reduced during the same year by 1.39 miles. "In Connecticut, where there are no very large cities to inflate the trolley figures, and where one great steam railroad system is supposed to be the feudal were 20 per cent. more passen-gers on the electric lines in 1900 than on the steam roads." Mr. Moffet says;

"Inch by inch the field is contested, and slowly, sullenly, the locomotive is giving way before the insistent trolle A dozen years ago it was only the car horse and the cable in the towns that were threatened by electric traction. were threatened by electric traction.

Then the trolley poked an inquiring tentacle over the city limits into the tentacle over the city limits into the suburbs. The results were satisfactory, and swiftly the electric lines flung their spider filaments from town to town, until now great sections of the country are cobwebbed with them. The trolley map of Eastern Massachusetts looks as complete as the steam railroad map. If you have a little time to spare you can go on an electric tar to spare you can go on an electric tar to road map. It you have a little tallet spare you can go on an electric car to almost any part of Southern New England that you could reach by a locomotive, and to a good many parts that

But the trolley roads do not confine their sphere of operations to the passenger business, by any means. They are transporting light freight of nearly all kinds in increasing quantities and in this line of business also they seem to be distancing their competi-The electric transportation system lends itself with peculiar adaptability to the business of local freight carrying. As in passenger transportation, it has the advantage of frequent service, and it is entirely practicable to stop at all points which the exigencies of the business require. "There is no roublesome red tape about the trolley freight system." observes Mr. "The Cleveland and Eastern Railway, for instance, handles milk on its forty-mile line at a uniform rate of two cents per gallon for any distance. The farmer buys packages of tickets at that rate. When his milk is shipped it pays its fare, like a A twenty-cent ticket is handed to the conductor for each tengallon can. The conductor punches the tickets and passes them on to the office. The company returns the empty cans free."

Many persons who have watched with interest the growth of electric traction predict that it will be only a few years before the steam locomotive will be practically driven from the field by its younger rival. Present conditions, while they do not seem to warrant this sweeping prediction, are certainly not such as to make the result predicted seem impossible. Marvelous improvements have been made during the past few years in the transmission of power over long distances by electricity, and no man can say what improvements and discoveries the future may have in store. The trolley is a winner, thus far in its brief career. Who shall presume o place a limit to its achievements?

# UNCLE SAM'S NAVY.

Admiral Dewey recently created something like an international sensation, and aroused a considerable amount of indignant protest in the Fatherland, by remarks which he uttered-or was reported to have attered-to the effect that the American navy would be more effective in war than that of Germany, basing his obthat the American sallorman, like the American soldier, thinks for himself, while the German sailor and the German soldier are, to a great extent, automatons, being helpless without their officers. On the other hand, a dispatch from Berlin quotes a German Count as saying, in a Berlin paper, homogeneous, and always ready for mash Dewey's heterogenous assemblage, which had not a single modern rmored cruiser."

The Count regards the American aneuvers as "generally childish," and as "always resulting in defeats of ers thus gaining large newspaper glory." He refers to the "poor marksmanship of the West Indies fleets," to "its insufficient number of officers, and men." and to the "low morals of the navy, as indicated by the numerous desertions," and says he believes "the United States will some day have a fine fleet, but she has not one yet."

Here are two opposite views of the question. As in other cases, the truth probably lies somewhere "be-twixt and between." By the way, a visitor to Los Angeles for a few days, is one of those who does not take such an optimistic view of the Dewey. He declares that tonnage is the best factor for determining such a question. At present, the German navy has 500,000 tons of warship displacement affoat, and soon will increase this weight by another 100,000 tons. He says the displacement various navies is as follows: United States, 560,000 tons: England, 1,800,000 tons; France, 720,000 tons, Russia,

Capt. Hobson makes a strong plea or liberality in appropriations for the American navy. He is doubtless to maintain its position among the great powers of the world, we must of necessity have a powerful navy There is not the remotest prospec that any foreign army will ever be able to do damage on United States territory, but with the improvements that have been made in the range of guns, a foreign fleet could work in calculable damage to our coast cities We have a very long coast line to protect, on both sides of the continent. Until the Panama canal is completed t is a very long voyage from one coast to the other, and we cannot exwould be able to duplicate the marvel

ous feat of the Oregon. Then, again, we have our territorial possessions in the West Indies and in he Pacific Ocean to look after, while keeping an eye on developments in us keep our navy up to date, and at the same time let us not overlook the important necessity of providing Americans to man the ships, for while "displacement" is undoubtedly an important thing to reckon with yet that will avail little unless we have a sufficient supply of "the

When the great republic was less great than it is today, the enthusiastic American might have been excusable for making the eagle scream, on ocasion, but now that the nation has attained a larger growth, it is the part of wisdom and dignity to refrain from blustering and boasting. The fact is that our works, achievements, indusdevelopment. The souther the property well confine himself to republic may well confine himself to doing things, leaving to the admiring peoples of other lands to do the shouting for us, when they arrive on this soil, and witness what the Yankee has soil, and witness what the Yankee has peoples: "And the trade-mark of the sumphole is over it all," meaning, of course, this little old sections is a perfect sight in certain sections been engaging himself in achieving for the past forty years. Once we were known by our words, and the words were not always those of sanity and wisdom, but now it is the work of this people that is talking; and it is better thus. Let us go forward, keep the peace, work for the uplifting of the races, be patient under adversity, and not unduly puffed up when the wind of prosperity blows free. Let us keep on saying but little and sawing wood, as our great President suggested in his masterly speech at Chicago, and thus continue to advance the glory and the prestige of the land of the banner

With the great subway in New York ot yet finished, that city is agitating he question of further diggings, lookling to the transportation of the popu-lace in that overcrowded and tumultuous spot, where the human creature is too plenty for comfort. There is a big fight on as to whether the proposed extension of the subway system shall go under narrow and overcrowded Broadway, or beneath some one of the avenues to the westward of that street. In the face of the tremendous problem that faces the citizens of the great metropolis, our own transportation fights and problems look small, indeed. As the situation stands in New York, the city grows up in the air much faster than the excavators can burrow under the ground in order to relieve the tremendous congestion. But as New York has the money to pay for what she wants, the time may ye come when a passenger can travel lengthwise of the city without being jammed into a shapeless mass of hu-man suffering. ### THE PLAYHOUSES.

LOS ANGELES THEATER. "Are You a Mason?" is a farce-comedy of the real brand. Not a crude jumble of meaningless nonsense, but nonsense which has pith and point and purpose It is extremely funny from opening to close. Much of the play runs along the lines of genuine comedy and al-though it broadens into uproarious farce forward the close of the company of the close of t farce toward the close, it does not as any time degenerate into pointless va-pidity, as do so many of the productions which pass current on the con-

tions which pass current on the con-temporaneous stage as farce-comedy.

The piece is adapetd from the Ger-man of Laufs and Kratz, by Lee Dit-richstein. The fun is all about two men who attempt to pass themselves off as Freemasons for the purpose of deceiving the female members of their respective families. Of course there is a grand mix-up-several of them; in fact—and the comedy of errors goes merrily on through two and a haif hours of hearty laughter to its characteristic close which leaves everybody in the best of humor and ready to vote the entertainment "a good thing."

The play is well acted by a company far above the average in fistrionic ability. John C. Rice and Thomas Adwise, in the roles, respectively, of Frank Perry and Amos Bloodgood, are a host. Each evinces a keen appreament. off as Freemasons for the purpose of

far above the average in histrionic ability. John C. Rice and Thomas Adwise, in the roles, respectively, of Frank Perry and Amos Bloodgood, are a host. Each evinces a keen appreciation of the humor in his role, and each presents an interesting character study totally different in type but with clearly-defined characteristics even down to minute details. The work of these two men entitles them to be ranked as artists in comedy.

Each character in the play is presented with care and effectiveness. Frank Abeles does quite a clever bit as "Fanchon." George Richard gives a good representation of John Hatton, acountryman newly moved into the city. Charles J. Greene is acceptable as Hamilton Travers.

The women in the cast are beautiful—and they carry their several roles with marked ability. The character of Mrs. Caroline Bloodgood is managed with discretion by Gettrude Whitty and Amy Muller is an unqualified success as Eva (Mrs. Perry.) Sally Cohen as Lottie (cook to the Perry's) is quite satisfactory.

The engagement is for three nights, with a matine on Wednesday afternoon.

BURBANK. Raiph Stuart had one of the most dramatic opening nights.

of the most dramatic opening nights last Sunday ever experienced in Bur-bank walls. The bill was "The Master bank walls. The bill was "The Master at Arms," a play built round the story of Don Caesar de Basan. This happy-go-lucky beggar nobleman has been the central figure of many a romance. He is the hero of the tuneful opera. Maritans; the hero of "A Royal Rival" and "Don Caesar's Return," played by Faversham and Hackett, respectively, last season and above all the hero. Paversham and Hackett, respectively, last season, and above all the hero of the stirring drama so gailantly played by Alexander Salvini, "Don Caesar de Bazan." Don Caesar is a soldier of fortune and as such appeals to every lover of romance. Stuart does not put enough dash into the character, but he fully appreciates its humorous possibilities. He plays with sincerity, with force, and with a whimsical carcleseness that make a very attractive composition. Then again he has a handsome physique and winning personality, which would make him Don Caesar reincarnate had he an added dash of spice.

Miss MacGregor's work grows on the spectator. She possesses a striking

added dash of spice.

Miss MacGregor's work grows on the spectator. She possesses a striking and mobile face, a good voice, though she is a little too fond of the minor key, and she realizes the escace of effective contume. Ms Maritans she has less to do than in previous roles, but she presents the character attractively. less to do than in previous roles, but she presents the character attractively. In her strenuous moods she is reminiscent of Blanche Walsh and, although less powerful, she has the advantage of refinement. Priestly Morrison gives an excellent performance of Charles II, King of Spain, sumamed "The Royal Idiot." His make-up is too old, however. He is entirely identified with the character and wins complete jaucess. Frank Camp, as Don Salluste, the prime minister and archivillain, has a part much like that which he plays in Prince Otto. Once again does he meet death with a sword thrust, but does not this week make a sensational death fall backwards down a long flight of stairs. Mr. Camp is satisfactorily wicked as how allowed the same of the part. Miss Mary Horne plays Marianne, Queen of Spain, and Virginia Brissac does well with the unrealities of Inez. As Paquita, an aged duenna, Lillan Buckingham is amusing.

an aged duenna, Lillan Buckinghan is amusing.

The cast is a long one and there is glenty for everyone to do. The production is well-staged. On Sunday night the action was stopped several times, by the tremendous applause and recalls were numerous. The delight of the audience, noisily expressed, made it an exciting event.

ORPHEUM. ## Catarrh of the Biadder

Is a very common disease in both exxes; causes frequent urination, by which in time you lose control and ability to retain; causes irritation at the neck of the bladder; causes mucus in the urine resembling brick dust or thick whitish deposits. Old chronic irritation and frequent inflammation of the bladder frequent inflammation of the bladder are apt to result in chronic irritation and thickening of the nucous membrane of the bladder, urethra and prostate glands. There is a frequent desire to urinate, the fluid is fercibly or spamodically ejected in small quantities, and the passage is attended with aching, burning or spasmedic pais. All of which can be remeved by taking S. B. CATARRH CURE, which remeves the cause of inflammation or irritation by acting directly on the blood and nuceus acting directly on the blood and muc surfaces of the entire system. When Johnson was a novice around Bakersfield, he had for a manager, a saloon-keeper named Frank Carrillo, who may or may not be the best man in the world. It is said that some of the managers of prize fighters take the managers of prize fighters take about half or three-fourths of the win-nings of the men under their "direc-tion;" but whether this is true in the case of Johnson and Carrillo is not

known. In any event, Johnson and Carrillo about three months ago came out of their business clinch with a clean break, without waiting for any referee to give the command.

Johnson came to this city and soon had a good fight on here. The reason for his audden appearance was that for his sudden appearance was that Carrillo swore out a warrant in Ba-Carrillo swore out a warrant in Ba-kersfield, charging him with "va-grancy." The day before the fight here, Carillo appeared and had Johnson ar-rested for "embesslement," alleging that he had taken a watch belonging to Carrillo. The case, however, was squared some way and never came to trial.

It appears that the underneath facts It appears that the undernest facts of the case were that Johnson was really accused of stealing a buil purp that Carrillo had given him. This circumstance was an important link in the sausage, as it were, for it is an unwritten law in pugdom that no self-respecting fighter can ever hope to be a champion in his class unless he owns a dawg.

About a dozen of the eastern horses are still at Agricultural Park, but these will be sent to Sacramento and the northern part of the State to english the minor race meetings. The owner, who went yesterday and those who remain have only words of praise for their treatment while in Los Angeles, and declare that they will return here to race their horses at the first opportunity. They speak well of J. W. Brooks, lessee of Agricultural Park, who they say befriended them in many ways while here and paid for the car in which the shipment of horses was made.

# MEN'S DISEASES.

I Have Cured Hundreds of Cases Like Your Own.

There is no economy in employing an amateur to do an expert's task. Nine times in ten failure follows. In a large percentage of instances the result is harm. The average physician is an amateur in the treatment of men's diseases. He doesn't treat enough cases to learn a great deal about them. His time is so fully occupied in treating a full assortment of human ills that he cannot devote special study to any particular branch of practice. Most diseases are sufficiently simple as to require no special training other than that received in training other than that received in the more complex and perplexing ailments the family practicloner seldom cares to treat. He prefers to be relieved of tasks beyond his training, though cannot without fear of injuring a patient's confidence in his ability, recommend the services of a specialist instead of his own. If afficted with any of the ailments constituting my specialty, seek an expert and not an amateur's services.

### WEAKNESS

I have assertained by the closest ob-servation in thousands of cases that only in rare instances is the general constitu-tion or nervous system involved to any noticeable degree whatever, and that "weakness" in all its phases is merely a symptom of prostate disorder. Such cases may show temporary improvement under stimulating processes of treatment, but ultimate relayse is certain to follow such methods. The only radical cure is the removal of abnormal local conditions, and this I accomplish through carefully directed local measures. My treatment is entirely distinctive and original, and the results I claim are thorough and per-manents. Correct Methods Bring Correct Results.

Men of this age and generation are quick to determine which is the true and which the false. They have learned to judge the skilled workman in all vocations and reward him accordingly. It is particularly true of medicine that many unworthy men are by their charlatanism foisting themselves on the public as specialists in all lines. Many of these men are not physicians, merely adventurers whose whole aim is to deceive the people and make an easy living. The man of ordinary judgment can quickly detect these frauds when they come in contact with him. It is unfortunate that such a state of affairs is allowed to exist. An siling man deserves and should have honest, capable advice from a skillful, experienced and conscientious physician.

Dr. Harrison invites alling men to call and personally interview.

We court inquiry. We sak the public to judge us by our work.

Prize Essay Written by Arthu Latham Is Published-Essential Principles as Indicated by Him.

(BY DIRECT WIRE TO THE TIMES.) LONDON, April 6.—[Exclusive Dispatch.] A prize essay by Arthur Latham on the erection of a sanitarium for the treatment of tuberculosis in England is published. It was selected by the committee appointed by the king as expressing the best lines that past experience and original thought can suggest for the erection of such a sanitarium. The competition was open to medical men of all nationali-ties. About one hundred open to medical men of all national-ties. About one hundred and eighty essays were sent in, and in every case an architect collaborated with medical men in providing plans for such a building.

Electrical contractors say the strike of wiremen will be settled Friday, either through the surrender of the strikers or by the employment of full forces of non-union men. When the exodus from the Hewes Market took place, the latter part of March, overtures were made to Mr. Herrington to accompany the seceders to the new market on the Wolfskill tract at Third street and Central avenue. He was offered regular employment at good wages, but he elected to stay with his oid employer, and his wages go on just the same as before the exodus.

Notwithstanding the move, Herrington still finds enough to do at the Hewes Market to keep him busy. While attending to some work in the former tenants, who are now domiciled in the opposition market, drove into the building at Ninth and Los Angeles and surrounded Herrington, exclaming: "Now, we have got you. Get into the wagon. We are going to kidnap you and take you to the new market!"

They laid hold of him and boosted the motor than the vehicle, but he made his sexue from it, and is still doing business at the old stand. The fellows were only 'joshing' with Ira, but their triumph over 'Uncle' Hewes would have been more complete it they had succeeded in inducing the superintendent to Jim in the strike.

Mr. Hewers fine building was practically left vacant when his tenants seconded, but it is aiready filling up with new firms. The veteran capitalist and landord has not given up the fight for supremacy in the public-market business. The American and the Chinese flags are floating side by side over his building, the Stars' and Stripes being attached to the talier staff, of course, but the yellow hanner with the dragon of Cathay emboldered on its folds has a conspicuous place, in recognition of the loyal support given the Hewes Market by the Chinese contingent.

At the new market mouse, or rather the old city market remodeled by the market men's stock company, all is bustle and enthusiasm. All of the inside stalls are occupied, and a long row of new shed stalls in course of construction along the Third and Alameda-street sides of the market grounds, will soon be ready for occupancy by tenants who have bespoken them in advance. Another long row of stalls has been contracted for, and will be finished in time for the summer rush.

The new market house does not compare with the Hewes Market in its appointments, but the members of the new company and the stall renter generally profess to be comfortably located and satisfied with the quarters for the time being, or until such time as further improvements can be made for necturnal illumination, and the tenants say they are getting their money's worth.

Willing to Pay a Thousand Dollars for Pardon.

Heir to Wealth Wants to Buy Electric Roads and Get Drunk Every Day.

Perhaps the backer of William M. Garland in his application for a blan-ket street-railway franchize has been discovered. If it is not the Southern money to gridiron Los Angeles with a new street-railway system that will haul passengers at 2 cents per and furnish free passes to all the newspaper men and members of the City Council. Schor Guerero is a new-fledged millionaire, or at least he fells that way, and he has so much money that he proposes to get drunk every day in the year and for each jag buy absolution of the church at \$1000 per jag. That is one scheme Don Felipe has thought of as a good way of getting rid of his fortune. He has already enjoyed jag No. 1, and made a tender of the first \$1000 to his father confessor. As a secondary means to the same the first \$1000 to his father confessor.

As a secondary means to the same end, he also proposes to buy out the street railways of his late employer. Henry E. Huntington, and have private cars for himself and friends to ride in, or, if Mr. Huntington won't sell, then he will build roads of his own. That is where the application for the blanket franchise comes in. But Senor Guerrero still hopes Mr. Huntington will have the kindness to sell out to him.

Superintendent of Streets if the Council carries out the policy adopted at the session yesterday.

A resolution was introduced at the morning session by Councilman Not-ziger walch reads as tohows:

"Resolved that it be the sense of the Council that the Street Superintendent have charge of the street sweeping of the paved streets for the the year beginning July 1, 1902, and that the Street Superintendent furnish the Supery sommittee with a list of the necessary appliances and that the committee be annovined without a dissenting voice and it appears to be the fixed determination of the Council to inaugurate a reform in the methods of street sweeping. After an agitation of some weeks Street Superintendent Werdin recently secured an authorized to five forms.

Recently, during the last the land and forced the water back onto his water of his land and onto th Angeles, Redondo and Hermosa Baach Raliway Company, to which the city presented a right of way one mile in length along the ocean front, was the cally petitioner for the improvement. In view of the financial stringeacy he thought it would be foolish to request bids before the bonds for the new cutfall sewer were voted. Kern was of the same mind and the report was shelved temporarily. It is the belief of several of the Councilmen that the work can be done better when the contractors are at work on the outfall than at the present time.

The City Clerk was directed to advertise for bids to supply the city with 20,000,000 brick and 40,000 barrels of cement, more or less, for the construction of the outfall sewer and the storm drains.

It was decided to commence proceed.

It was decided to commence proceed-ings for the paving of Central avenue fromFirst to Twelfth streets. additional detectives, increasing the number from eight to eighteen. There is some doubt whether the Mayor will sign the ordinance, as it has been the purpose of the Police Commission, of which he is chairman, to secure ten more patrolmen. Detectives receive \$125 a month and patrolmen from \$75 to \$100 a month, according to length of service. It is the opinion of some of the city officials that there is not material for ten additional detectives in the department at the present time. The Morris Jones Oil Company having reduced its bid for supplying brantom \$25 to \$20 a ton and for furnishing barley from \$25 to \$24 a ton, the Council yesterday approved a new contract and bond presented by the company. In the first instance the bid of the company was the only one presented and the company recommended its acceptance. After the rains other firms offered to supply barley and bran at a less figure and the company was compelled to revise its figures.

Todd reported progress in his effort to secure ransfers for the citizens residing on Aliso street.

APPROPRIATION ASKED. Ferd K. Rule and Mayor Snyder appeared before the Council yesterday morning and asked that the city make an appropriation of \$2500 to the fiesta

fund.

"We plan to give a fine exhibition that will make Los Angeles far famed," declared Mr. Rule. "Kansas City became renowned for its electrical display last October, and we expect to surpass it. Kansas City had twelve and we will have fifteen floats. If the Council hesitates to make the appropriation because of a present shortage in the funds we will be satisfied if the payment is made after July 1, when the new fiscal year begins. The Fiesta Committee expects to expend about \$20,000 and \$17,000 of this must come from citizens. Thus far we have met with excellent success in Securing contributions.

Mayor Snyder urged the granting of the request. He said the Flesta would advertise the clay far and wide and that the burden of the advertising would fall most equitably if it was paid from general taxation, each man contributing in proportion to the property he owned.

After a spicy debate yesterday Coun-diman Summerland succeeded in secur-ing the adoption of a resolution em-lowering the Street Superintendent to izens living in the neighborhood have been ordered to move away by physi-cians, owing to the stagnant water.

Before the Supervisors had recovered from this petition, R. A. Fisher appeared, asking that action on the ordinance be postponed until April 21 in order to give time for a protest to be presented.

Whichever way the case is finally decided, the Supervisors have no joy in their work when it cômes to passing a pool-selling ordinance. The pressure on both sides is very strong, strong enough to make most of them squirm first on one side, then 'tother. If there were only some committee to which this pesky thing could be referred they would all be very, very happy. They have heard all they ever wish to hear of pools and ordinances. They all join in wishing that one F. D. Black would evaporate and disappear, and all his lik with him, that no magnates would get up race traces, and that no ministers were standing by to kick. FOR "JUSTICE." Coming from the plous Mr. Burke, who is accused of holding up the Pas-adena car. Judge Smith did not seem to take the charges against the police

Through his attorney, F. W. Hovey, Burke made the claim that the police have run out of town two witnesses who could prove him to be as innocent as a snow drop.

Burke did not look to be the typical snow drop when he was brought into

court yesterday under heavy double guard. He is a big, brutal cow puncher with cruel, shifty eyes that follow every move that anyone makes in the courtroom.

ought to be tried in some other county, where the feeling is not so bitter against highwaymen. Mr. Hovey wanted to read a news article from The Times to prove the bitterness of the sentiment against Burke.

The continuance was asked for on the ground that the police have driven the two witnesses, E. Ford and John Williams, out of town. The two man were room-mates of Burke at the time of the hold-up, and Burke claims that they could prove an alibi for him.

Detectives A. L. Smith and Hugh Dixon rather knocked the wind out of this charge by a counter affidavit. They each swore that Johnson and Ford had told them a different story. According to their version Ford and Johnson said that they did not see Burke that night until an hour or two after the hold-up.

It was finally agreed to try the pal of Burke, young Metzger, first, and see about the continuance then. Metzger, who does not want to be tried with Burke, will come up for trial April 12.

Commerce Commission.

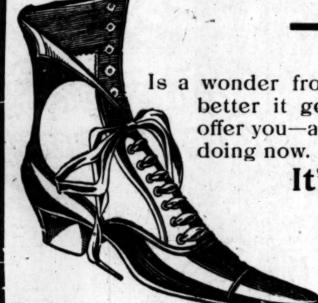

A former hearing in the same care
was held here nearly three years ago,
but so decision was reached on many
points, and it is for further arguments
on there points that the present hearing is held. The principal arguments
to be heard are as to whether the defendant carriers pool their citrus-fruit
traffic or divide earnings therefom;
whether the blanket rate of \$1.25 per
100 pounds on oranges and other citrus
fruits from Southern California to
points on and east of the Missouri River and the minimum carload weight of
\$2,000 pounds are unjust and unreasonable under the provisions of the statute, and whether the statute applies
to the charges for refrigerating and
if so, whether those charges are unreasonable.

Metropolis Wants "Our Frank."

J. W. Cook of Portland, formerly of Glendora, is in Los Angeles on a brief visit and is exerting himself to induce Secretary Wiggins of the Chamber of Commerce to go to the Oregon metropolis to introduce there the brand of promotion and publicity that has made him so popular in Los Angeles county. Mr. Cook for, four years was a member of the Board of Supervisors, representing the First District, and in 1892-94 he was chairman of the board. He went north for the benefit of his health, and is engaged in the real estate business in Portland.

"Portland is feeling the wave of prosperity," said Mr. Cook, "but we could stard more of it. Our people are very conservative and not inclined to iaunch into the bold schemes for improvement, and growth that have been introduced in Los Angeles, turning the eyes of the world this way. We have a Chamber of Commerce, but it is not so active as yours, and one reason is because we have not Frank Wiggins to carry out its plans. We could use him there to advantage, and could well afford to pay him \$600 per month for his services. We need him especially at this time as we are preparing for the Lewis and Charle Exposition of 1905.

"Frosident Roosevelt is to be in Portland May 21 and is expected to turn the first shovel in breaking ground for the buildings. The Legislature of Oregon has appropriated \$60,000 for the enterprise and the city of Partland is expected to contribute a sime a from other sources that will swell the amount to a much larger figure. Most of the Western States have made appropriations to transfer their exhibits from the St. Louis Fair to Portland, and there is no doubt but that we shall have representations from all States in the Union, as well, as from foreign countries.

These mines are eight miles south of Ludlow on the Santa Fe road, below Baratow, and are owned by men of wealth and position, most of them living East. A railroad has been begun from Ludlow to the mines by the mine twners, called the Ludlow & Southers, and is only awaiting the rails, which are promised this month, to be complete. The rolling stock has been purchased and stands in the yards at Barstow. The road is of standard ruage and the cars will be run through to the mill at Barstow with the ore from the mines.

All work was stopped yesterday and he mill at Barstow, owned by the same company, will be overhauled and much seem machinery will be put in. The company proposes to work the mine engetically under the general management of E. H. Stagg, who is also a tockholder, and many improvements will be made. Additional houses will be muilt for the use of the employés. A seneral store will supply the men with verything necessary for their comport, but no whisky will be allowed on he grounds.

THE BOOKLOVERS LIBRARY

# A Two-Minute Talk

### TO INVESTORS.

an unparalleled record. The stock is held in the United States, Canada and England by widely known literary, professional and business people. Among the library's shareholders are hundreds of names familiar to almost every cultured home. No broker, or banker, or underwriter has had a hand in the sales. The sele backing of the cencern has been its enterprise, its continuous push, and As far-seeing business policy. Every dollar invested shows a buildred cents' worth of extended and established earning

The plans outlined from time to time have been carried forward in the most aggressive sort of way. We have done what we said we would de. We planned to extend the Booklovers to every important city of the United States; the libraries are there. We promised to include Canada; the two successful centres of Montreal and Toronta are the result; from these cities the service extends to outlying Canadian cities and towns. We made argangements for extending the work to England; to-day the Booklovers is the talk of London; it is delivering books throughout Great Britain and includes among its patrons scores of the most distinguished families. We promised an auxiliary library to take care of the field not occupied by the Booklovers; the Tabard Inn, with its revolving book-cases and five-cent exchanges, is extending the library privileges to thousands of country towns; the earnings of this one department at the present time exceed one thousand dellars a day with only one-twentieth of the field covered. This new library department was started only a year ago. In another year it will have earning capacity largely in excess even of the Booklovers. Last fall we announced the preparation of a monthly magazine to round out our publicity plans; today The Booklovers Magazine sells out its complete edition by the fitteenth of each month; it is owned independently by shareholders of the parent company, and presents all the elements of an excellent property.

We are building into the future; the whole book and publishing trade is undergoing rapid and far, reaching changes; there is a new book published in the United States every hour, day and night, and this enormous output must have its distributing machinery. Millions invested in central storehouses of granite or marble can never change the popular current. The American people want an up-to-date service in books as well as in newspapers, and they are willing to pay for it with their own cash. There is no denying the fact that the Booklopers is already a tremendous power among the book interests of the country; it has battled its way to the front, where it means to stay.

We need a central library and office building of our own, and we intend to build one just as soon as a desirable central property in Philadelphia can be secured. This is the next important thing to be done. The block of \$0,000 Shares of Stock referred to below has been set aside largely for this purpose.

In connection with this public offer of a comparatively small block of Booklovers stock there are four inside facts which I want to make public over my own signuture: 1. The Booklovers earnings during the three months ending February 98th were the largest in the history of the enterprise; 2. The operating expenses per library member were never smaller than at the present time; 3. The "used books" are wholly taken care of at good prices by auxlliary library departments; 4. The Corporation pays cash, and has no no debts other than its current monthly accounts.

No additional capital is needed for the Booklovers; the in-creased capital is being used at the present time to extend the Tabard Invand other departments; these auxiliary libraries are necessary to round out the best interests of the enterprise at large; they are the by-products of the business and they offer opportunity

The Corporation is capitalized for \$2,600,000 (260,000 Shares at \$10 each.) Of this amount 190,000 Shares have already been subscribed and paid for at the par value of \$10. making the present cash capital \$1,900,000. There remain in the Treasury only 70,000 Shares. Of this remaining block the Directors have authorized the Treasurer to set seide 80,000 Shares to be offered for sale on May 18 next, at \$13 a share. The remainder, consisting of 20,000 Shares, is now offered to the are 10 per. cent. with the application and the balance in sixty days. Stock applied for by telegraph will be held five days to await deposit and formal application. (See form of application below.) The sale of this block of 20,000 Shares new at \$10 and of the remaining block of 80,000 Shares on May 15 at \$19 will give the Company a completely paid-up Capital. This announcement gives investors the last opportunity they will have of buying Booklovers at \$10 a share.

The Booklovers Corporation has paid dividends at the rate of 10 per cent. per year since August 1, 1900. The last half-yearly dividend was paid on February 20th. The half-yearly dividend periods end June 30th and December 31st, respectively. The Corporation has no bonded debts, and its stock when fully paid is non-assessable. All Shares become dividend-bearing from the date of final payment, Dividends are payable in February and

man Womans' Club of Buffalo, N. Y., after doctoring for two years, was finally cured of her kidney trouble by the use of Lydia E. Pinkham's Vegetable Compound.

Of all the diseases known with which the female organism is afflicted, kidney disease is the most fatal. In fact, unless prompt and correct treatment is applied, the weary patient seldom survives.

Being fully aware of this, Mrs. Pinkham, early in her career, gave exhaustive study to the subject, and in producing her great remedy for woman's lils—Lydia E. Pinkham's Vegetable Compound—was careful to see that it contained the correct combination of herbs which was sure to control that dreaded disease, woman's kidney troubles. The Vegetable Compound acts in harmony with the laws that govern the entire female system, and while there are many so called remedies for kidney troubles, Lydia E. Pinkham's Vegetable Compound is the only one especially prepared for women.

Read What Mrs. Weisslitz Says.

"Dear Mus. Pinkham:— For two years my life was simply a burden, I suffered so with female troubles, and pains across my back and loins. The doctor told me that I had kidney troubles and prescribed for me. For three months I took his medicines, but grew ateadily worse. My husband then advised me to try Lydia E. Pinkham's Vegetable Compound, and brought home a bottle. It is the greatest blessing ever brought to our home. Within three months I was a changed woman. My pain had disappeared, my complexion became clear, my eyes bright, and my entire system in good shape."—Mrs. Paula Weisslitz, 176 Seneca St., Buffalo, N. Y.

Weisslitz, 176 Seneca St., Buffalo, N. Y.

Proof that Eidney Trouble can be fured by Lydia E. Pinkham's Vegetable Compound.

"Dear Mirs. Pinkham:—I feel very thankful to you for the good your medicine has done me. I had doctored for years and was steadily growing-sworse. I had trouble with my kidneys, and two doctors told me I had Bright's disease; also had falling of the womb, and could not walk a block at a time. My back and head ached all the time, and I was so nervous I could not sleep; had hysteria and fainting spells, was tired all the time, had such a pain in my left side that I could hardly stand at times without putting my foot on something.

"I doctored with several good doctors, but they did not help me any. I took, in all, twelve bottles of Lydia E. Pinkham's Vegetable Compound, five loxes of Liver Pills, and used three packages of Sanative Wash, and feel like a new woman, can ext and sleep well, do all my own work, and can walk two miles without feeling over tired. The doctors tell me that my kidneys are all right now. I am so happy to be well, and I feel that I owe it all to your medicine."—Mirs. Oral. Strone, Dalton, Mass.

# Every Knock a Boost

Little do the coterie of boycotters who are using so much of their venom in abuse of this store realize that just such methods are proving their undoing, for the public are so thoroughly acquainted with the villany which seeks to make a reputable commercial institution a catspaw to pull their chestnuts from a fire of their own kindling in another quarter—that all their efforts to injure Hamburger's have not only proven futile, but in reality are bringing us new patrons. Their two latest moves—the sending of defamatory letters over the signature of one Biddle to persons who trade with us; and their use of female emissaries who are making house to house canvass with the same object—are well known to us; and we have now several hundred of these letters which we accepted as cash on purchases at valuations from 50c to \$50.00 each; and we know the women who are being used for such contemptible work and can place them at any hour of the day.

All of these despicable efforts are making dollars for us; and a number of persons who are strangers in Los Angeles knowing nothing of these conditions, have first learned of Hamburger's through these channels and as sane, self-respecting people have come to the store, brought their letters and spent their money with us. A case in point within the past ten days—one stranger who has just fitted up an apartment house spent more than \$700.00 at Hamburger's and received \$75.00 for a letter sent by boycotter Biddle. Our reputation for honorable dealing is too well established to be injured by such character assassins and every one of their knocks is a boost for us.

Though wash fabrics are much in demand still a great majority of people wear woolen gowns at all seasons only changing the weight of the textiles themselves. In buying woolen materials this season you have but to consider the purpose for which the dresses are wanted. If for outing, rainy day or beach purposes, we would suggest a stylish suiting and if for evening or reception gowns the thin and sheer textiles. But whatever may be your desires in these wantables, it is the great Hamburger store that can show you by far the largest assortment of all the new weaves and at prices within the reach of every pocketbook. There is no inflati on of values nor any palming off of goods which some other retail merchant of a country cross roads pannot sell, and call them new and stylish.
